

HIPAA Compliance Support

Comprehensive resources, programs and toolkits provided by
NATIONAL ONCOLOGY ALLIANCE

Anticipating the implementation deadlines of new HIPAA legislation, NOA provides custom ready forms and checklists to make sure you stay in compliance with all regulations.

About NOA's HIPAA Support Services

In March of 2003, National Oncology Alliance (NOA) recognized the need to offer general HIPAA Compliance support to all members. NOA sent all members the *HIPAA Compliance Toolkit*, addressing the practice's need to meet complicated, intricate HIPAA compliance rules and regulations. The toolkit equipped members with a set of draft policies and procedures, templates for forms and letters, a HIPAA training section, and a CDROM containing custom-ready forms.

In further support of clinical research, NOA members also received the newest addition to the HIPAA Toolkit, *Research and the Privacy Rule* in January of 2004. In the course of conducting research, investigators create, use, and/or disclose individually identifiable health information. This new chapter recognized the need to protect the privacy of such information, while still providing access for research purposes.

All of NOA's HIPAA services are available to oncology practices. As well, all members can receive email support within 72 hours through our hotline at hipaa@noainc.com.

To request a free *HIPAA Compliance Toolkit*, please contact your NOA Member Services Representative today.

- **Compliance Toolkits!**
- **Custom-ready forms!**

New from NOA!
HIPAA Security Toolkit
Coming this Fall!

This fall, every NOA Member practice will receive a free copy of the new NOA HIPAA Security Toolkit, addressing new legislation which will affect all oncology practices in early 2005.
