Introduction to Oncology Pharmaceutical Services

Click here to register for "Introduction to Oncology Pharmaceutical Services"

Think you can't improve the financial outlook of your oncology practice while enhancing patient care?

You can – by tapping into the right knowledge and support. In today's environment, it is important to access all available resources to ensure the economic success of your practice and remain focused on patient care. Oncology Pharmaceutical Services (OPS) is an option many practices across the country are now choosing as one of these resources. OPS offers customized services to enhance practice success and address an uncertain future. OPS, a division of US Oncology, is designed specifically to support and serve the needs of the independent oncology practice.

In this 45-minute webcast, you will gain a better understanding of the OPS service model and, ideally, be able to determine if OPS is a resource you would like to learn more about. The webcast format includes a 30-minute presentation followed by a 15-minute Q & A forum.
